[Problem statement]

Create a landing page for a pet store based on the following layout:

[Elements]

- Welcome to the Pet World! (Plain text)
- Dog, Cat, Parrot (Clickable buttons)
- Right image (dog, cat, parrot)

[Minimum requirements]

- You can choose any CSS style from the following: (**No Plugins**)
- Rounded button styles
- Font (Size,Color,Type)
- Correct image size
- The default image will be the dog's image.
- When a user clicks a button, the image of the button's logic must appear on the right replacing the image that is already present. For example, when a user clicks the Cat button, a cat's image must appear.

[Additional points]

Ensure that the UI is aesthetically pleasing to gain extra points.
